Pylones Snake Bike Lock

A colourful and decorated cable lock with reinforced metal core and snake decoration. The lock comes with two keys. They are inserted into the 'mouth' of the snake to release the lock. More of a fun visual reference than a theft deterrent as it could be easily cut with readily available hand tools. However, the snake lock opens up the potential for use of semiotics in security design. It would be better if the lock bit you or maybe sprayed venom – see Mike Lambourne's 'Smart Lock' [here](#) [Link to Smart Lock Example].

Type:

Cable

Price:

\$30

Sold Secure Rating:

None

Composition:

Reinforced metal core, durable cloth exterior and hand painted detail.

Strengths:

- Unique, novelty design
- Cheap
- Cloth exterior protects paintwork

Weaknesses:

- Available in kids size only
